

# Task\_4

- Run the image Nginx

```
docker run -d --name nginx-container -p 80:80 nginx
```

- Add html static files to the container and make sure they are accessible

```
echo "hello from nginx" > index.html
```

```
docker cp ./ nginx-container:/usr/share/nginx/html
```

- Commit the container with image name nginx-container-image

```
docker commit nginx-container nginx-container-image
```
